Projects and Activities at Netherlands eScience Center

Dr. Jason Maassen
Netherlands eScience Center

Lugar: Aula 2.0B. Facultad de Informática (UDC)

Data: jueves, 3 de octubre de 2013

Hora: 18:00

This talk will provide an overview of the projects and activities of the Netherlands eScience Center, particularly those related to high performance computing, distributed computing, and sensor networks.

Dr Jason Maassen, BS (1998) and Ph.D. (2003) at VU University Amsterdam is one of the main architects of the Ibis project. Dr. Maassen has participated during his career in projects related to large scale distributed computing, developing a monitoring system for a world-wide Grid, robust communication libraries, programming models for computing on heterogenous distributed systems, and several e-Science applications. Dr. Maassen joined the NLeSC in 2012, where he works on the climate research project and continues his work on developing libraries and tools for high performance distributed computing.
